

Basic Considerations When Selecting an Asbestos Consultant or Contractor

The attached list includes all consultants and contractors. Please note that some of these individuals or companies are certified to perform work in different categories. You, as the building owner, should be aware of possible conflicts of interest and may want to be aware of certain things in order to make a decision that you will be comfortable with.

Inspections - You would look under the heading *Asbestos Consultant Entities* or the heading *Individual Asbestos Consultants*. The consultant can conduct an inspection and may also be certified to perform other functions such as management planner (mostly for schools), project designer (design the abatement specifications) or project monitor (monitor the contractor during abatement or conduct the final air and visual clearance).

Abatement - Under the heading, *Commercial Asbestos Abatement Entities* you can find companies that will conduct repair, removal, enclosure and encapsulation activities.

When you hire an inspector, if asbestos is found, you may choose to ask the inspector for further assistance in planning the abatement. The inspector may assist you by making contacts with abatement contractors. A project designer can be hired to design the abatement that a contractor would follow or the abatement company can put together work specifications. As the building owner, you have the choice to hire either a project designer or the abatement contractor. A project monitor can be hired to do oversight on the abatement contractor but must be hired to conduct the final visual and air clearance required to determine if the area meets the state regulations for clearance. **A project monitor cannot be an employee of the contractor.**

We recommend that you obtain at least three bids from any category that you might hire from. You may choose to have the inspector/project designer consultant assist you in getting the bids and hiring of the project monitor. You may choose to have the consultant just handle the whole thing. Also, you can choose to do the hiring yourself, which may reduce any conflict of interest issues.

In general, conflicts of interest relate to the potential for self-gain usually, but not always, of a fiscal nature. A potential or actual conflict of interest exists when commitments and obligations are likely to be compromised by a person's other interests or commitments, especially economic, particularly if those interests or commitments are not disclosed.

You should ask the contractor or consultant to provide you a written proposal that describes what they will do, the content of the final report, schedule, and budget. The following checklist should help property owners, homebuyers, and renters ensure that their asbestos inspector and abatement contractor is trained, qualified, and capable.

Asbestos Service Provider Checklist

- Service provider name.
- Telephone number.
- Certification numbers and copy of asbestos license.
- When does the certification (licenses) of the listed persons expire?
- Does the service provider have solid references from 3 recent jobs?
- Have you checked enforcement history with the VT Department of Health?
- Does the service provider carry general liability and/or errors-and-omissions insurance with specific coverage for asbestos?
- How many years of experience does the service provider have in asbestos work?
- For asbestos abatement, will the contract specify that a visual and air clearance test be passed?
- Will the service provider cover costs associated with failing a clearance test (recleaning and retesting)?
- What is the schedule and budget estimate for services?
- What does a sample contract and final inspection, or abatement report look like?

State program staff can assist you in providing information regarding on-file enforcement actions on asbestos consultants and contractors. We can also explain the abatement process and answer any other questions you may have. **Call 1-800-439-8550 for information.**

Asbestos Entities and Consultants

On the following pages are listings of:

- **Asbestos Consulting Entities (Companies)**
- **Individual Asbestos Consultants**
- **Commercial Asbestos Abatement Entities**
- **Asbestos Analytical Services**

They are certified in accordance with the Vermont Regulations for Asbestos Control. Certified firms and individuals must be used to perform asbestos-related services in Vermont.

If you have any questions, please call the Asbestos Regulatory Program at (802) 863-7236 or in Vermont (800) 439-8550.
