GRAND TOTAL	26	40	18	37	43	50	54	105	138	330	74	323	85	270	85	1678

* Only cases that meet the CDC case definition are included. For cases through 2007, the case definition can be found at: http://www.cdc.gov/ncphi/diss/nndss/casedef/lyme_disease_1996.htm. Starting 01/01/08 the case definition was changed and it can be found at: http://www.cdc.gov/ncphi/diss/nndss/casedef/lyme_disease_2008.htm. Cases with Vermont exposure (cases in which it has been determined that infection was likely acquired in Vermont) are noted by county of residence. The number of imported cases (cases in Vermont residents which were determined to have most likely been acquired out of state) are totalled for each year. Unknown cases (cases in which potential exposure could have been both in and out of Vermont) are totalled starting in 2003. Prior to 2003 these cases are included in the number of imported cases.

Lyme Disease Cases in Northeastern States 1999 - 2008

State	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008***	2009***	**Incidence 2009
