

## Race and Ethnicity Data

The following tables (7 and 8) are the race and ethnicity estimates produced for the National Center for Health Statistics (NCHS) by the US Census Bureau. Census 2000 introduced a more detailed race and ethnicity categorization scheme than had been used previously, and subsequent estimates produced by the Census Bureau have used the new categories. NCHS contracted with the Census Bureau to produce estimates which bridge the new race and ethnicity categories back to the categories in use prior to Census 2000. Estimates using the Census 2000 race and ethnicity categories are available from the US Census Bureau at [www.census.gov](http://www.census.gov).

While racial and ethnic minorities are only 4.0 % of the Vermont population (Figure 6) , in general, these populations are growing at a much faster rate than the non-Hispanic white population. The non-white population of Vermont was 17,049 in 2008, up 32.6% since July 2000. The number of persons of Hispanic origin was 8,588 in 2008, up 54.1% from July 2000. The white, non-Hispanic population increased less than one percent from 2000-2008 to 596,207. The American Indian, Eskimo and Aleut population was the only race category showing a decline since 2000. The Asian and Pacific Islander population increased 30.5% since July 2000, and the Black population of Vermont has increased 64.1% in that time. Hispanic origin is an ethnic category, so persons of Hispanic origin are included in each race category. The exploded view in Figure 6 shows only the white Hispanic population, there are a small number of Hispanic people included in each of the three non-white race categories as well.

Figure 6. 2008 Distribution of Vermont Population by Race and Ethnicity

The racial and ethnic minority populations in Vermont are heavily concentrated in Chittenden County. While Chittenden County had 24.6% of the total population of Vermont, 45.9% of the non-white population and 31.8% of the Hispanic population resides in Chittenden County. The lone exception being the American Indian, Eskimo and Aleut population, where Franklin County has the largest population.

It should be noted that the year 2000 populations presented in tables 7 and 8 are estimates as of July 1, 2000 and not the April 1 Census counts. Information regarding the methodology used in producing the bridged race and ethnicity estimates is available from the NCHS at [http://www.cdc.gov/nchs/nvss/bridged\\_race.htm](http://www.cdc.gov/nchs/nvss/bridged_race.htm).
